Progress : LAB 3 - Inspecting a Remote

Link drive : <https://drive.google.com/drive/folders/1ucITBdhuS7BX32-GjhnoZMzfvSi5kBJQ?usp=sharing>

The screenshot displays a Windows desktop environment. On the left, a PDF viewer shows a document titled "Inspecting a Remote". The document content includes a paragraph explaining the `git remote show origin` command and its output. On the right, a terminal window shows the execution of various Git commands and their corresponding outputs.

**PDF Content:**

### Inspecting a Remote

If you want to see more information about a particular remote, you can use the `git <remote>` command. If you run this command with a particular shortname, such as `origin`, something like this:

```
$ git remote show origin
* remote origin
Fetch URL: https://github.com/schacon/ticgit
Push URL: https://github.com/schacon/ticgit
HEAD branch: master
Remote branches:
  master                tracked
  dev-branch            tracked
Local branch configured for 'git pull':
  master merges with remote master
Local ref configured for 'git push':
  master pushes to master (up to date)
```

**Terminal Output:**

```
minghthanh@LAPTOP-00327C27 MINGW64 ~/Desktop/MSIS3033.Mr.Thien/user/project/ticgit (master)
$ git fetch pb
remote: Enumerating objects: 43, done.
remote: Counting objects: 100% (22/22), done.
remote: Total 43 (delta 22), reused 22 (delta 22), pack-reused 21
Unpacking objects: 100% (43/43), 5.99 KiB | 65.00 KiB/s, done.
From https://github.com/paulboone/ticgit
* [new branch]      master    -> pb/master
* [new branch]      ticgit    -> pb/ticgit

minghthanh@LAPTOP-00327C27 MINGW64 ~/Desktop/MSIS3033.Mr.Thien/user/project/ticgit (master)
$ git fetch <remote>
bash: syntax error near unexpected token 'newline'

minghthanh@LAPTOP-00327C27 MINGW64 ~/Desktop/MSIS3033.Mr.Thien/user/project/ticgit (master)
$ cd C:/Users/minhthanh/Desktop/MSIS3033.Mr.Thien/user/project
minghthanh@LAPTOP-00327C27 MINGW64 ~/Desktop/MSIS3033.Mr.Thien/user/project (main)
$ git fetch <remote>
